

Threshold Concept		Milestone 1 (Prior Learning in KS1)	Milestone 2
<p>Work scientifically This concept involves learning the methodologies of the discipline of science.</p>		<p><u>Ask questions and plan an enquiry</u> • Ask simple questions.</p>	<p><u>Ask questions and plan an enquiry</u> • Ask relevant questions.</p>
		<p><u>Set up an enquiry</u> • Perform simple tests.</p>	<p><u>Set up an enquiry</u> • Set up simple, practical enquiries and comparative and fair tests.</p>
		<p><u>Observe and measure</u> • Observe closely, using simple equipment.</p>	<p><u>Observe and measure</u> • Make accurate measurements using standard units, using a range of equipment, e.g. thermometers and data loggers.</p>
		<p><u>Record</u> • Gather and record data to help in answering questions.</p>	<p><u>Record</u> • Record findings using simple scientific language, drawings, labelled diagrams, bar charts and tables.</p>
		<p><u>Interpret and Report</u> • Use observations and ideas to suggest answers to questions. • Identify and classify.</p>	<p><u>Interpret and Report</u> • Gather, record, classify and present data in a variety of ways to help in answering questions. • Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions. • Use straightforward, scientific evidence to answer questions or to support their findings.</p>
			<p><u>Evaluate</u> • Use results to draw simple conclusions and suggest improvements, new questions and predictions for setting up further tests. • Identify differences, similarities or changes related to simple, scientific ideas and processes.</p>

Threshold Concept	Milestone 1 (Prior Learning in KS1)	Milestone 2
<p><u>Biology</u></p> <div data-bbox="327 226 486 383" style="text-align: center;">  </div> <p>Understand plants This concept involves becoming familiar with different types of plants, their structure and reproduction.</p>	<ul style="list-style-type: none"> • Identify and name a variety of common plants, including garden plants, wild plants and trees and those classified as deciduous and evergreen. • Identify and describe the basic structure of a variety of common flowering plants, including roots, stem/trunk, leaves and flowers. • Observe and describe how seeds and bulbs grow into mature plants. • Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy. 	<ul style="list-style-type: none"> • Identify and describe the functions of different parts of flowering plants: roots, stem, leaves and flowers. • Explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant. • Investigate the way in which water is transported within plants. • Explore the role of flowers in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.
<div data-bbox="319 965 497 1122" style="text-align: center;">  </div> <p>Understand animals and humans This concept involves becoming familiar with different types of animals, humans and the life processes they share.</p>	<ul style="list-style-type: none"> • Identify and name a variety of common animals that are birds, fish, amphibians, reptiles, mammals and invertebrates. • Identify and name a variety of common animals that are carnivores, herbivores and omnivores. • Describe and compare the structure of a variety of common animals (birds, fish, amphibians, reptiles, mammals and invertebrates, including pets). • Identify name, draw and label the basic parts of the human body and say which part of the body is associated with each sense. • Notice that animals, including humans, have offspring which grow into adults. • Investigate and describe the basic needs of animals, including humans, for survival (water, food and air). • Describe the importance for humans of exercise, eating the right amounts of different types of food and hygiene. 	<ul style="list-style-type: none"> • Identify that animals, including humans, need the right types and amounts of nutrition, that they cannot make their own food and they get nutrition from what they eat. • Construct and interpret a variety of food chains, identifying producers, predators and prey. • Identify that humans and some animals have skeletons and muscles for support, protection and movement. • Describe the simple functions of the basic parts of the digestive system in humans. • Identify the different types of teeth in humans and their simple functions.

Investigate living things

This concept involves becoming familiar with a wider range of living things, including insects and understanding life processes.

- Explore and compare the differences between things that are living, that are dead and that have never been alive.
- Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants and how they depend on each other.
- Identify and name a variety of plants and animals in their habitats, including micro-habitats.
- Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.

- Recognise that living things can be grouped in a variety of ways.
- Explore and use classification keys.
- Recognise that environments can change and that this can sometimes pose dangers to specific habitats.

Understand evolution and inheritance

This concept involves understanding that organisms come into existence, adapt, change and evolve and become extinct.

- *Identify how humans resemble their parents in many features.*

- *Identify how plants and animals, including humans, resemble their parents in many features.*
- *Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.*
- *Identify how animals and plants are suited to and adapt to their environment in different ways.*

Threshold Concept		Milestone 1 (Prior Learning in KS1)	Milestone 2
<p><u>Chemistry</u></p>	 <p>Investigate materials This concept involves becoming familiar with a range of materials, their properties, uses and how they may be altered or changed.</p>	<ul style="list-style-type: none"> • Distinguish between an object and the material from which it is made. • Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water and rock. • Describe the simple physical properties of a variety of everyday materials. • Compare and group together a variety of everyday materials on the basis of their simple physical properties. • Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. • Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick/rock, and paper/cardboard for particular uses. 	<p><u>Rocks and Soils</u></p> <ul style="list-style-type: none"> • Compare and group together different kinds of rocks on the basis of their simple, physical properties. • Relate the simple physical properties of some rocks to their formation (igneous or sedimentary). • Describe in simple terms how fossils are formed when things that have lived are trapped within sedimentary rock. • Recognise that soils are made from rocks and organic matter. <p><u>States of Matter</u></p> <ul style="list-style-type: none"> • Compare and group materials together, according to whether they are solids, liquids or gases. • Observe that some materials change state when they are heated or cooled, and measure the temperature at which this happens in degrees Celsius (°C), building on their teaching in mathematics. • Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.

Threshold Concept		Milestone 1 (Prior Learning in KS1)	Milestone 2
Physics	 <p>Understand movement, forces and magnets This concept involves understanding what causes motion.</p>	<ul style="list-style-type: none"> • <i>Notice and describe how things move, using simple comparisons such as faster and slower.</i> • <i>Compare how different things move.</i> 	<ul style="list-style-type: none"> • Compare how things move on different surfaces. • Notice that some forces need contact between two objects, but magnetic forces can act at a distance. • Observe how magnets attract or repel each other and attract some materials and not others. • Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials. • Describe magnets as having two poles. • Predict whether two magnets will attract or repel each other, depending on which poles are facing.
	 <p>Understand light and seeing This concept involves understanding how light and reflection affect sight.</p>	<ul style="list-style-type: none"> • <i>Observe and name a variety of sources of light, including electric lights, flames and the Sun, explaining that we see things because light travels from them to our eyes.</i> 	<ul style="list-style-type: none"> • Recognise that they need light in order to see things and that dark is the absence of light. • Notice that light is reflected from surfaces. • Recognise that light from the sun can be dangerous and that there are ways to protect their eyes. • Recognise that shadows are formed when the light from a light source is blocked by a solid object. • Find patterns in the way that the size of shadows change.

Investigate sound and hearing

This concept involves understanding how sound is produced, how it travels and how it is heard.

• Observe and name a variety of sources of sound, noticing that we hear with our ears.

• Identify how sounds are made, associating some of them with something vibrating.

• Recognise that vibrations from sounds travel through a medium to the ear.

Understand electrical circuits

This concept involves understanding circuits and their role in electrical applications.

• Identify common appliances that run on electricity.

• Identify common appliances that run on electricity.

• Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers.

• Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery.

• Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit.

• Recognise some common conductors and insulators, and associate metals with being good conductors.

Understand the Earth's movement in space

Understanding what causes seasonal changes, day and night.

• Observe the apparent movement of the Sun during the day.

• Observe changes across the four seasons.

• Observe and describe weather associated with the seasons and how day length varies.

• Describe the movement of the Earth relative to the Sun in the solar system.

• Describe the movement of the Moon relative to the Earth.

Italics = not statutory in the National Curriculum
